SUMMARY

Software Engineer with 3 years of experience building fast and reliable applications across web and native platforms. Skilled in C++, Python, Java, JavaScript, React.js with a focus on clean code and efficient problem-solving across the stack.

EXPERIENCE

SDE

Razornext

06/2025 - Present

Frontend Developer

- Developed a hyperlocal e-commerce marketplace with multi-store support, product catalog, cart, cart conflict resolution, and order management using Next.js and TypeScript.
- Contributed to the admin panel for category, catalog, coupons, order, and customer management.
- Used TanStack Query for efficient API handling and Zustand for scalable state management.
- Improved Core Web Vitals and performance using page optimization and caching techniques.
- Toskie talent onboarding GraphQL, Websocket, RBAC, Strapi, Next.js, TypeScript, Redis to reduce redundant backend calls, improve response times. Also worked on Flipkart blogging platform.

Web Development Intern

SaralTech

12/2024 - 06/2025

Web Development

- Worked on a networking platform for early-stage startups to connect with Investors using React.js, JavaScript, TailwindCSS, Next.js, Cloudflare D1, Drizzle ORM
- Implemented OAuth 2.0 for secure authentication and centralized data storage with single sign-on (SSO)
- Transitioned backend architecture to a monolithic Next.js API + Edge environment model
- Implemented CI/CD pipeline with GitHub Actions to Cloudflare Pages, improving release efficiency
- Also worked on Ed Tech platform for creating classroom and connect Tutors with Students

2019 - 2024

Study break to prepare for UPSC exam

Software Engineer

Samsung R and D Institutes

07/2017 - 09/2018 Noida

System Software Team

- Developed a System Cleaner application (C++, Tizen OS) for Samsung Smart TVs, optimizing cache, memory, temperature, and app data to improve system performance.
- Built a Python-based diagnostics and stability monitoring backend with automation (Python + XML), enabling real-time logging and root cause analysis, reducing crashes by 30%.
- Designed Python data pipelines and ETL workflows (Pandas/SQL) to analyze 10+ years of telemetry data, identifying high-risk modules and improving system reliability.
- Implemented RESTful services and backend automation workflows for targeted diagnostics diagnostics and testing, reducing redundant test cycles.
- Integrated C++ modules with Python backend, enabling monitoring and data-driven insights.

Software Engineer Trainee

Samsung R and D Institutes

12/2016 - 06/2017 Noida

System Software Team

- Developed monitoring dashboards (Prometheus, Grafana, Tableau, Power BI) to visualize system performance, telemetry data, and anomaly detection.
- Built web-based internal tools (HTML, CSS, JavaScript) integrated with backend diagnostics, improving workflow efficiency by 25% and reducing onboarding time by 20% (500+ users).

EDUCATION

Bachelor of Engineering in Computer Engineering

Netaji Subash Institute of Technology, NSIT

07/2012 - 07/2016 Delhi

Class XII and X CBSE

JNV Mungeshpur

04/2008 - 05/2011 Delhi

SKILLS

JavaScript, C++, React.js, Java, Tailwind CSS, HTML, CSS, Git, Python, Redux, MongoDB, Express.js, Next.js, Node.js, Mongoose, Redis, Postman, CI/CD, GitHub Actions, Vercel, Render, Cloudflare D1, TanStack, MongoDBCompass, Razorpay Payment, TypeScript, Zustand, Strapi, GraphQL, Figma, WebSocket

PROJECTS

StudySphere Edtech Platform *Link*

- Multi-role platform connecting students, instructors, and admins. Responsive UI (tabs, sliders, animations), email OTP signup, profile editing (picture, about, password update, cron-based deletion), and admin manages categories
- Instructors can create, edit, and delete courses (including subsections, videos, and publish status), with earnings and enrollment charts
- Students can access a multi-course cart, use "Buy Now" options with Razorpay payment integration, watch video lectures (accordion view, mark complete, navigate), track progress, give star ratings and reviews, courses page with frequently bought courses, contact form

Clinic Appointment *Link*

- Responsive medical booking website with a Google Sheets-integrated appointment form for real-time data storage.
- Dynamic blog categories, testimonial sliders, and mobile-friendly layout.

CERTIFICATION

Frontend Developer (React) *Link*
HackerRank

JavaScript Algorithms and Data Structures *Link*
FreeCodeCamp

KEY ACHIEVEMENTS

Outstanding Performance Award
Received Quarterly Outstanding Performance Award out of 50+ engineers for exceptional project contributions

Internship Recognition
Awarded for showcasing a strong will to deliver over & above assigned roles & responsibilities during internship
